序

（財）自治体国際化協会及び政策研究大学院大学では、平成 17 年度より「自治制度及び運用実態情報海外紹介等支援事業」を実施しています。同事業は、現在、海外に対する我が国の自治制度とその運用の実態に関する情報提供が必ずしも十分でないとの認識の下、我が国の自治制度とその運用の実態に関する外国語による資料作成を行うとともに、国内外の地方自治に関する文献・資料の収集などを行うものです。

平成20年度には、前年度に引き続き、『自治関係の主要な統計資料の英訳』、『アップ・ツー・デートな自治関係の動きに関する資料』、『分野別自治制度及びその運用に関する説明資料』の作成を行うとともに、比較地方自治研究センターに収蔵すべき国内外の地方自治関係文献・資料の調査を行うこととしました。また、新たに『我が国の地方自治の成立、発展に関する資料』の調査研究をスタートしました。

本事業については、平成 21 年度においても引き続き検討を進め、地方自治体関係者が実務を行う際などにおいて活用していただけるものに改善していきたいと考えています。

本事業の内容などについてご意見があれば、（財）自治体国際化協会国際情報課、又は政策研究大学院大学比較地方自治研究センターまでお寄せいただくようお願いいたします。

Foreword

The Council of Local Authorities for International Relations (CLAIR) and the National Graduate Institute for Policy Studies (GRIPS) have been working since FY 2005 on a "Project on the overseas dissemination of information on the local governance system of Japan and its operation". On the basis of the recognition that the dissemination to overseas countries of information on the Japanese local governance system and its operation was insufficient, the objective of this project was defined as the pursuit of comparative studies on local governance by means of compiling in foreign languages materials on the Japanese local governance system and its implementation as well as by accumulating literature and reference materials on local governance in Japan and foreign countries.

In FY 2008, we continued to compile "Statistics on Local Governance (Japanese/English)" "Up-to-date Documents on Local Autonomy in Japan" and "Papers on the Local Governance System and its Implementation in Selected Fields in Japan". We also continued to conduct a search for literature and reference materials concerned with local governance in Japan and overseas to be stored in the Institute for Comparative Studies in Local Governance (COSLOG). In addition, we have started a new research to compile a new series on "Historic Development of Japanese Local Governance".

This project is to be continued in FY 2009, and we aim to improve the materials so that they will be of real use and benefit to those who are working in the field of local governance.

If you have any comments, suggestions or inquiries regarding our project, please feel free to contact the Council of Local Authorities for International Relations (CLAIR) or the Institute for Comparative Studies in Local Governance (COSLOG) of the National Graduate Institute for Policy Studies (GRIPS).

Preface

This booklet "Statistics on Local Governance (Japanese / English)" was produced in fiscal year 2008 as one of the activities for the Project on the Overseas Dissemination of Information on the Local Governance System of Japan and its Operation. This project is a joint project with the National Graduate Institute for Policy Studies and Council of Local Authorities for International Relations (CLAIR) which was started in fiscal year 2005. For this project a research committee was created, and a chief and deputy chiefs are assigned for each activity. The following research committee members (official positions are as of March 2009) worked specifically for producing this booklet.

(Chief)

Shunsuke Kimura Professor, National Graduate Institute for Policy Studies

(Deputy Chiefs)

Hideo Tsunoda Deputy Secretary General for Exchange and Information Department, Exchange and Information Department
Council of Local Authorities for International Relations

As the process of compiling this booklet, we first selected statistical materials relevant for translation into English, and then translated and compiled them together with their originals in Japanese. The reference source used for the determining the terms were the "New Japanese-English Comprehensive Dictionary of Civil Service Terms" (edited by Sendai Shiyakusho Koumu Eigo Kenkyu Kai, published by Gyousei, 2003), "Local Government in Japan 2006" (edited and published by the Council of Local Authorities for International Relations, 2005), Official Gazettes of Japan (English version), and etc.

The following table lists the materials which were translated in fiscal year 2008. These materials are the fiscal year 2008 editions revised with updated data on previously translated materials (items No.1-6 were translated for the first time in fiscal year 2005, items No.7-11 were translated starting in fiscal year 2006, and items No.12-14 were translated starting in fiscal year 2007).

In addition, in fiscal year 2008, we revised two kinds of glossaries which are included as content in the above table. The first is a glossary of 75 terms used in the "White Paper on Local Public Finance (FY2008). The second is a glossary of terms used in the "Disclosure of Information on Local Public Employees' Compensation" (48 terms).

We will continue to review the content of this booklet and update new statistical data.

Finally, I would like to express my sincere appreciation to Professor Shunsuke Kimura and Mr. Hideo Tsunoda, who worked on this booklet, and to the other members of the research committee for their valuable input.

Note 1: The figures for ordinary balance ratio, net balance ratio, and financial capability indicator in the columns of municipalities are calculated excluding data for special wards and partial-affairs-associations, and the figures for their debt service burden ratio are calculated including data for these bodies. The figures for their debt service ratio used as a criterion for permission to raise local loans and debt service ratio include data for partial-affairs-associations. This rule is also applies to Section 2 and Section 3.

Note 2: The figures for ordinary balance ratio, net balance ratio, debt service ratio used as a criterion for permission to raise local loans, debt service burden ratio and debt service ratio are weighted averages, and the figures for financial capability indicator are simple averages. However, the figures for debt expenditure burden ratio and debt service ratio used as a criterion for permission to raise local loans and the figures for debt service ratio used as a criterion for permission to raise local loans in parenthesis for FY 1997 and the following years are simple averages.

Note 1 : The group classification is as follows:

groups	B 1	B 2	C	D	E
financial capability indicator	from 0.7 to 1.0	from 0.5 to 0.7	from 0.4 to 0.5	from 0.3 to 0.4	below 0.3

Note 2 : (1) Except for the Tokyo Metropolitan Government, the amounts of local taxes exclude the amounts granted to municipalities as grant from interest-based prefectural inhabitant tax, Grants from the dividend levy of prefectural inhabitant tax, Grants from the levy on capital gain from stocks, local consumption tax grant, grant from tax on usage of golf facilities, special local consumption tax grant, automobile acquisition tax grant, and light oil delivery tax grant. (hereinafter collectively referred to as “the 8 grants”).

(2) The amounts of local taxes for the Tokyo Metropolitan Government exclude financial equalization grant to special wards as well as the 8 grants above.Taking into consideration that the amounts of local taxes for the Tokyo Metropolitan Government include revenues from taxes which are ordinarily classified as municipal taxes but collected by the Tokyo Metropolitan Government, figures in the parentheses show the amounts after deducting those tax revenues in addition to the six grants above.

Note 3 : The per capita amounts are calculated by dividing the total amounts by the population registered on basic resident registers as of March 31st, 2007. This also applies to Section 2.

注）　1 国内総支出は、内閣府経済社会総合研究所の推計により、平成9年度以降は「国民経済計算（93SNA、平成7年基準）」、昭和36年度は「国民経済計算（新SNA、平成2年基準）」、昭和10年度及び16年度は「国民所得統計（旧SNA）」によっており、いずれも名目値である。ただし、昭和10年度及び16年度は国民総支出の数値である。

2 国の歳出額は、平成9年度以降については、一般会計と交付税及び譲与税配付金、国有林野事業（治山勘定のみ）、国営土地改良事業、港湾整備、道路整備、空港整備、治水、石油及びエネルギー需給構造高度化対策、厚生保険（児童手当勘定のみ）及び電源開発促進対策（電源立地勘定のみ）の10特別会計との純計決算額であり、昭和36年度以前においても、一般会計とこれらの特別会計に相当する特別会計がある場合には、それらの特別会計との純計決算額である。

3 「国から地方に対する支出」は、地方交付税（地方分与税、地方財政平衡交付金、臨時地方特例交付金及び特別事業債償還交付金等を含む。）、地方譲与税及び国庫支出金（交通安全対策特別交付金、国有提供施設等所在市町村助成 交付金及び地方債のうち特定資金公共事業債及び特定資金公共投資事業債を含む。）の合計額であり、地方の歳入決算額によっている。

4 「地方から国に対する支出」は、地方財政法第17条の2の規定による地方公共団体の負担金（地方の歳出決算額中、国直轄事業負担金に係る国への現金納付額及び国に対する交付公債の元利償還額の合計額）である。

5 決算額からは、特定資金公共事業債償還時補助金及び同補助金と相殺された償還金を除いている。

Note 1 : The figures for gross domestic expenditure are shown at current prices and estimated by the Economic and Social Research Institute of the Cabinet Office on the basis of 93SNA for 1997 and the following fiscal years, 68SNA for FY1961, and 53SNA for FY1935 and FY1941 fiscal years. For FY1935 and FY1941, however, the figures are those of the gross national expenditure.

Note 2 : The amount of the national expenditure for 1997 and the following fiscal years is the net total of settled accounts including the general account, and the following 10 special accounts: “local allocation tax and local transfer tax”, “national forest service (only erosion control sub-account)”, “national land improvement projects”, “port development”, “road development”, “airport development”,“flood control”, “petroleum and energy supply/demand structure advancement measures”, “welfare insurance (only child allowance account)”, and "power source development promotion (only location account)”. For fiscal years before 1994, the amount of the national expenditure is the net total of settled accounts of the general account and special accounts, if any, which are equivalent to these 10 special accounts

Note 3 : “Payment from national to local” is a total of “local allocation tax” (including “local apportionment tax”, “local finance equalization grant”, "temporary special local grant” and “grant for the redemption of a special works loan” etc.), “local transfer tax” and “national government disbursements” (including “special grant for traffic safety”, “municipal charge on military bases”, “public works loan financed by specific funds” and “public investment works loan financed by specific funds”). It is based on the amount of settled accounts of local revenue

Note 4 : “Payment from local to national” is the money incurred by local public bodies under Article 17-2 of the Local Finance Law (among the settled accounts of local expenditure, the total sum of cash payment to the national government related to obligatory share of public works directly carried out by the national government, and the amount of the redemption of the principal and interest of public compensation bonds paid to the national government are included).

Note 5 : The amounts of settled accounts exclude the subsidy for the redemption of public works loans financed by specific funds and the redemption money which is offset by this subsidy.

Ordinary account

地方公共団体における地方公営事業会計以外の会計で、一般会計のほか、特別会計のうち地方公営事業会計に係るもの以外のものの純計額となる。

個々の地方公共団体ごとに各会計の範囲が異なっているため、財政状況の統一的な掌握及び比較が困難であることから、地方財政統計上便宜的に用いられる会計区分。

The term “ordinary account” denotes an account of local public bodies excluding the local public businesses account; it is calculated as the net total amount of the general account and all special accounts except those classified in the local public businesses account.

Because each local public body defines the limits of the general account and special accounts differently, it is hard to grasp its financial condition and make a comparison in a unified manner by using this type of accounting division method. Therefore, the concept of “ordinary account” is used for the sake of convenience in local financial statistics.

10　地方公営事業会計
Local public businesses account

地方公共団体の経営する公営企業、国民健康保険事業、老人保健医療事業、介護保険事業、収益事業、農業共済事業、交通災害共済事業及び公立大学附属病院事業に係る会計の総称。

都道府県決算額と市町村決算額を単純に合計して財政規模を把握すると地方公共団体相互間の出し入れ部分について重複するため、この重複部分を控除して正味の財政規模を見出すことを純計という。

したがって、都道府県決算額と市町村決算額の合計額は地方財政の純計額に一致しないことがある。

The simple sum of the amounts of prefectural settled accounts and municipal settled accounts does not reflect the precise scale of local public finance because of the duplication caused by money transferred from one local government to another. The term “net total amount of settled accounts” obtained by deducting these duplications, is used to grasp the real scale.

Therefore, the sum of the amounts of prefectural settled accounts and municipal settled accounts may not be the same as the net total amount of settled accounts of all local governments.

通常、「黒字団体」、「赤字団体」という場合は、実質収支の黒字、赤字により判断する。

The term “net balance of settled accounts” denotes the real balance between revenue and expenditure during one fiscal year. It is calculated by deducting the funds to be carried forward to the next fiscal year as a reserve for continuing expenditure, and the expenses given budgetary approval to be brought forward (the amount in the expenditure budget which is not expended within the fiscal year in question, for example because of the nature of the expenditure, or because of some reasons arising after the budget was given final approval, and is carried forward by the budget to the next fiscal year) from the gross balance of the settled accounts.

この指標は経常的経費に経常一般財源収入がどの程度充当されているかを見るものであり、比率が高いほど財政構造の硬直化が進んでいることを表す。

The term “ordinary balance ratio” denotes an index for identifying the elasticity of the financial structure of local public bodies, and is calculated as a percentage of the amount of general revenue sources which are used for expenditures that are ordinarily disbursed every fiscal year (ordinary expenditure) such as personnel expenses, social assistance expenditure, and debt service, in relation to the total amount of general revenue sources which can be ordinarily raised or received every fiscal year, represented by local taxes and ordinary local allocation tax (ordinary general revenue sources), a tax cut compensation loan, and an extraordinary financial measures loan.

This index is used to see to what extent ordinary general revenue sources are appropriated for ordinary expenditures, and it also shows that a higher ratio means less flexibility in the financial structure.

51　実質公債費比率
Real debt service ratio used as a criterion for permission to raise local loans

地方公共団体における公債費による財政負担の度合いを判断する指標として、起債に協議を要する団体と許可を要する団体の判定に用いられるもの（地方財政法第 5 条の 4 第 1 項第 2 号）。

起債制限比率について、準元利償還金の範囲等の見直しを行ったものであり、実質公債費比率が 18％以上となる地方公共団体については、地方債協議制度移行後においても、起債に当たり許可が必要となる。

実質公債費比率が２５％以上の団体については、一定の地方債（一般単独事業に係る地方債）の起債が制限され、３５％以上の団体については、さらにその制限の度合が高まる（一部の一般公共事業に係る地方債についても起債が制限される。）こととなる。

"Real debt service ratio used as a criterion for permission to raise local loans" is an index to assess the financial burden of debt service expenditure for each local public body, and is used to judge whether a local public body is required to hold a prior consultation or to obtain permission before raising local loans (Article 5-4, paragraph 1, item 2 of the Local Finance Law.

This new index has been introduced on the basis of a review of the concept of quasi-redemption of principal and interest with regard to debt service ratio formerly used as a criterion for permission to raise local loans. Local public bodies with a ratio of 18% or more are required to obtain permission to raise local loans even under the current system which in principle requires local public bodies to hold a consultation in advance.

For local public bodies with this ratio of 25% or more, the flotation of certain local government loans (loans for unsubsidized general public works) is restricted; and those with a ratio of 35% or more are subject to severer restriction (loan flotation for some types of subsidized general public works is also restricted).

52　起債制限比率
Debt service ratio used as a criterion for permission to raise local loans

地方公共団体における公債費による財政負担の度合いを判断する指標の一つで、地方債元利償還金及び公債費に準じる債務負担行為に係る支出の合計額（地方交付税が措置されるものを除く。）に充当された一般財源の標準財政規模及び臨時財政策対策債発行可能額の合計額（普通交付税の算定において基準財政需要額に算入された公債費を除く。）に対する割合で過去３年間の平均値。

The term "debt service ratio used as a criterion for permission to raise local loans" denotes one of the indexes used to see the degree of financial burden of debt service on local public bodies, and is calculated as the past three-year average of the ratio of general revenue sources appropriated for the total amount of the redemption of the principal and interest on local government loans, and expenditures based on liabilities authorized in previous years that can be treated similarly to debt service in the relevant context (excluding from the total amount expenditures which are covered by local allocation tax), in relation to the sum total of the standard financial scale and the maximum amount of extraordinary financial measures loans that can be raised (excluding from the total the debt service amount which is included in the basic financial needs in the calculation of ordinary local allocation tax).

53　公債費負担比率
Debt service burden ratio

地方公共団体における公債費による財政負担の度合いを判断する指標の一つで、公債費に充当された一般財源の一般財源総額に対する割合。

公債費負担比率が高いほど、一般財源に占める公債費の比率が高く、財政構造の硬直化が進んでいることを表す。

The term "debt service burden ratio" denotes one of the indexes used to see the degree of financial burden imposed by debt service on local public bodies, and is calculated as a percentage of the amount of general revenue sources appropriated for debt service in relation to the total amount of general revenue sources.

A larger figure for the debt service ratio means that a higher percentage of general revenue sources is expended for debt service and, therefore, the financial structure is less flexible.

54　実質収支比率
Net balance ratio

実質収支の標準財政規模に対する割合。実質収支比率が正数の場合は実質収支の黒字、負数の場合は赤字を示す。

The term "net balance ratio" denotes the ratio of the net balance of settled accounts to the standard financial scale. When it is a positive number, the net balance of settled accounts is in surplus, and when it is a negative number, the net balance is in deficit.

地方公共団体の財政力を示す指数で、基準財政収入額を基準財政需要額で除して得た数値の過去３年間の平均値。

財政力指数が高いほど、普通交付税算定上の留保財源が大きいことになり、財源に余裕があるといえる。

The term “financial capability indicator” is used to indicate the financial strength of local public bodies, and is calculated as the past three-year average of the figures derived from dividing basic financial revenues by basic financial needs.

A higher figure of financial capability indicator means more revenue sources are reserved in the calculation of ordinary local allocation tax, and that the local public body can be said to have a greater margin for revenue sources.

56　標準財政規模
Standard financial scale

地方公共団体の標準的な状態で通常収入されるであろう経常的一般財源の規模を示すもので、標準税収入額等に普通交付税を加算した額。

The term “standard financial scale” denotes the scale of ordinary general revenue sources which would normally be raised or received by local public bodies under normal conditions, and it is equal to the total sum of the standard tax revenue, etc. and ordinary local allocation tax.

57　標準税収入額
Standard tax revenue

地方税法に定める法定普通税を、標準税率をもって、地方交付税法で定める方法により算定した収入見込額。具体的には、法定普通税の基準税額の合計をいう。

The term “standard tax revenue” denotes the amount of revenue from ordinary taxes defined in the Local Tax Law, and is estimated by applying the standard tax rates and calculation methods prescribed in the Local Allocation Tax Law. Article 214 and 215 of the Local Autonomy Law provide that acts incurring a liability shall be a component of a budget of local public bodies.

Basic financial needs

普通交付税の算定基礎となるもので、各地方公共団体が、合理的かつ妥当な水準における行政を行い、又は施設を維持するための財政需要を算定するものであり、各行政項目ごとに、次の算式により算出される。

単位費用　×　測定単位　×　補正係数
（測定単位１当たり費用）　（人口・面積等）　（寒冷補正等）

The term “basic financial needs” denotes a basis for the calculation of ordinary local allocation tax, and represents the financial needs of a local public body in order that it can render administrative services and maintain public facilities at a reasonable and acceptable level. The required sum is computed for each classification of administrative services by using the following formula;

Unit cost　×　Figure of unit of service　×　Adjustment coefficients
(Cost per unit of service)　(Population, area, etc.)　(Cold climate adjustment, etc.)

66　単位費用
Unit cost

標準的団体（人口、面積、行政規模が道府県や市町村の中で平均的で、積雪地帯や離島等、自然的条件や地理的条件等が特異でない団体）が合理的、かつ妥当な水準において地方行政を行う場合等の一般財源所要額を、測定単位１単位当たりで示したもの。

The term “unit cost” denotes an amount of general revenue sources expressed as per unit of service which may be needed in the cases where a local public body under standard conditions (a local public body whose population, area, and scale of administration are on an average level among prefectures or municipalities, and where the natural or geographical conditions are not exceptional as in the cases of snowy areas or isolated islands) renders local administrative services at a reasonable and acceptable level.

67　測定単位
Unit of service

道府県や市町村の行政項目（河川費や農業行政費等）ごとにその量を測定する単位。例えば、河川費においては河川の延長が用いられる。

The term “unit of service” denotes a unit of quantity which is used in measuring separately the quantity of each classification of services of prefectures or municipalities (e.g. river expenses, agricultural administration expenses). For instance, the length of a river within the area of a local public body is used as a unit of service for river expenses.

68　補正係数
Adjustment coefficients

すべての道府県や市町村に費目ごとに同一の単位費用が用いられるが、実際には自然的・地理的・社会的条件の違いによって大きな差があるので、これらの行政経費の差を反映させるため、その差の生ずる理由ごとに測定単位の数値を割り増し又は割り落としている。これが測定単位の数値の補正であり、補正に用いる乗率を補正係数という。

Although the same figures denoting unit costs for the classification of administrative services are applied to all prefectures or municipalities uniformly, there are wide differences in administrative costs among local public bodies under different natural, geographical, or social conditions. Therefore, in order to reflect those differences properly, the figures denoting units of service are increased or decreased according to the causes of the differences. This process is referred to as adjustment of the figures denoting the unit of service, and the multiplying rates used for such adjustment are called “adjustment coefficients.”

69　基準財政収入額
Basic financial revenues

普通交付税の算定に用いるもので、各地方公共団体の財政力を合理的に測定するために、標準的な状態において徴収が見込まれる税収入を一定の方法によって算定するものであり、次の算式により算出される。

標準的な地方税収入　×　７５／１００　＋　地方道路譲与税等

“Basic financial revenues” are used in the calculation of ordinary local allocation tax. For the rational measurement of the financial ability of each local public body, local tax revenues which may be collected under standard conditions are estimated by a certain method, and the computation formula is as follows;

Standard local tax revenues × ７５／１００ ＋ Local road transfer taxes, etc.

70　留保財源
Reserved revenue sources

基準財政収入額の算定においては、法定普通税等の税収見込額の全額を算入対象とせず、基準税率を乗じてその一部を算入しているが、この基準財政収入額に算入されなかった税収入は、地方交付税の算定上捕捉されず、各地方公共団体に留保されることから、留保財源と呼ばれている。なお、平成 15 年度に都道府県に係る留保財源率の引上げが行われ、都道府県、市町村とも税収見込額の 25％（従来は都道府県 20％、市町村 25％）とされている。

In the calculation of basic financial revenues, not all of the expected amount of revenue from local taxes defined in the Local Tax Law is included, but a part of the amount is included by applying standard tax rates. The remaining portion of tax revenues which has not been included in basic financial revenues is referred to as reserved revenue sources, as it is not reflected in the calculation of local allocation tax and is reserved for each local public body. The reserved revenue sources percentage for prefectures was raised from 20% of the expected amount of local tax revenues to 25% in FY2003, which fixed the percentage for both prefectures and municipalities at 25%.

71　ラスパイレス指数
Laspeyres Index

加重指数の一種で、重要度を基準時点（又は場）に求めるラスパイレス式計算方法による指数。ここでは、地方公務員の給与水準を表すものとして、一般に用いられている国家公務員行政職（一）職員の俸給を基準とする地方公務員一般行政職職員の給与の水準を指す。

Laspeyres Index is a type of fixed-weight index, and is calculated by the Laspeyres formula which uses the base period or the base point as a weighted factor. In the context here, it is used as an indicator of the salary level of local public personnel and, as is generally the case, shows the comparative salary level of general administration service personnel in local public bodies compared to that of national public personnel to whom the Salary Schedule for Administrative Services (I) is applied.

Note 1 : The indices of per capita tax revenues are expressed as values relative to the national average of all prefectures equaling 100. Population is based on the basic register of residents, as of March 31st, 2007.

Note 2 : Revenues from taxes ordinarily classified as municipal taxes but imposed and collected by Tokyo Metropolitan Government within the area of special wards are not included in prefectural tax revenues, but in municipal tax revenues. ２東京都の収入については、都が徴収する市町村税相当分は道府県税収入から控除して市町村税収入として加算した。
３各項目毎に四捨五入しており、合計と一致しないことがある。

Note 1 : The indices of per capita tax revenues are expressed as values relative to the national average of all prefectures equaling 100. Population is based on the basic register of residents, as of March 31st, 2007.
Note 2 : In the Tokyo Metropolitan Government row in this table, revenues from taxes ordinarily classified as municipal taxes but imposed and collected by Tokyo Metropolitan Government within the area of special wards are treated as municipal taxes and included.
Note 3 : The figures for“total”may not be equal to the exact sum of each item because each figure is rounded off in this table.

「明治の大合併」

近代的地方自治制度である「市制町村制」の施行に伴い、行政上の目的（教育、徴税、土木、救済、戸籍の事務処理）に合った規模と自治体としての町村の単位（江戸時代から引き継がれた自然集落）との隔たりをなくすために、町村合併標準提示（明治 21 年 6 月 13 日内務大臣訓令第 352 号）に基づき、約 300～500 戸を標準規模として全国的に行われた町村合併。結果として、町村数は約 5 分の 1 に。

“The mass amalgamations of the Meiji era”

Before the enforcement of the City Code and the “Town and Village Code” which aimed to establish a modern system of local administration, mergers of towns and villages were carried out nationwide by setting a standard of about 300-500 households in one town or village on the basis of the Announcement of the Standard for the Mergers of Towns and Villages (Home Minister Directive No. 352 issued on June 13, 1888), in order to enlarge the size of towns and villages at that time from a size that reflected that of natural communities in the Edo period to a size that was suitable for the effective administration of education, tax collection, public works, relief work, and the family register. As a result, the number of towns and villages decreased to about one-fifth.

「昭和の大合併」

戦後、新制中学校の設置管理、市町村消防や自治体警察の創設の事務、社会福祉、保健衛生関係の新しい事務が市町村の事務とされ、行政事務の能率的処理のためには規模の合理化が必要とされた。昭和 28 年の町村合併促進法（第 3 条「町村はおおむね、8000 人以上の住民を有するのを標準」）及びこれに続く昭和 31 年の新市町村建設促進法により、「町村数を約 3 分の 1 に減少することを目途」とする町村合併促進基本計画（昭 28 年 10 月 30 日閣議決定）の達成を図ったもの。約 8000 人という数字は、新制中学校 1 校を効率的に設置管理していくために必要と考えられた人口。昭和 28 年から昭和 36 年までに、市町村数はほぼ 3 分の 1 に。

“The mass amalgamations of the Showa era”

After World War II, administrative tasks such as the construction and management of junior high schools under the new education system, fire defense and police administration, and functions related to social welfare, health and sanitation, were newly assigned to municipalities, requiring rationalization of the size of municipalities so as to enable effective and efficient management of their tasks. The national government aimed to achieve the Basic Plan for the Promotion of the Mergers of Towns and Villages (decided by the Cabinet on October 30, 1953) which aimed at a decrease in the number of towns and villages to about one-third, ecrease in the number of towns and villages to about one-third, Mergers of Towns and Villages enacted in 1953, of which Article 3 provides that towns and villages shall have a population of about 8000 or more as a standard, and the Law for the Promotion of Construction of New Municipalities enacted in 1956 replacing the Merger Law. The population of about 8000 was taken as a target because it was considered necessary for a municipality to have such a population size as the minimum for the effective management of one junior high school. The number of municipalities actually decreased to about one-third between 1953 and 1961.

指標の説明
Explanation of financial indices

○ 経常収支比率
Ordinary balance ratio

地方税、普通交付税のように使途が特定されておらず、毎年度経常的に収入される財源のうち、人件費、扶助費、公債費のように毎年度経常的に支出される経費に充当されたものが占める割合。

The term “ordinary balance ratio” is calculated as a percentage in relation to the total amount of the sum total of revenue sources which are not earmarked and can be ordinarily raised or received every fiscal year, as represented by local taxes and ordinary local allocation tax, of those revenue sources which are used for expenditures that are ordinary disbursed every fiscal year such as the personal expenses, social assistance expenditure, and debt sources.

$$\text{経常収支比率} = \frac{\text{人件費、扶助費、公債 費等に充当した一般財 源等}}{\text{経常一般財源等（地方 税＋普通交付税等）＋ 減税補てん債＋臨時財 政対策債}} \times 100$$

$$\textbf{Ordinary balance ratio} = \frac{\textbf{Amount of general revenue used for personnel expenses, social assistance expenditures, debt service, etc.}}{\textbf{Ordinary general revenues (local taxes + ordinary local allocation tax, etc.) + tax cut compensation loans + extraordinary financial measures loans}} \times 100$$

○ 実質公債費比率
Real debt service ratio used as a criterion for permission to raise local loans

地方税、普通交付税のように使途が特定されておらず、毎年度経常的に収入される財源のうち、公債費や公営企業債に対する繰出金などの公債費に準ずるものを含めた実質的な公債費相当額（普通交付税が措置されるものを除く）に充当されたものの占める割合の前 3 年度の平均値。地方債協議制度の下で、18％以上の団体は、地方債の発行に際し許可が必要となる。さらに、25％以上の団体は地域活性化事業等の単独事業に係る地方債が制限され、35％以上の団体は、これらに加えて一部の一般公共事業債等についても制限されることとなる。

Real debt service ratio used as a criterion for permission to raise local loans is calculated as the past three-year average of the percentage of the sum total of revenue sources which are not earmarked and can be ordinarily raised or received every fiscal year, as represented by local taxes and ordinary local allocation tax, allocated to expenditures that can be substantially treated as debt payments including debt service expenditures and transfers to public enterprise accounts which are used for the redemption of local government loans through those accounts (excluding the amount of those expenditures that are covered by ordinary local allocation tax). Even under the current system which requires local public bodies to hold a consultation in advance of raising local loans, local public bodies with a ratio of 18% or more are required to obtain permission for the flotation of local government loans. Local public bodies with a ratio of 25% or more are restricted to the flotation of local government loans for unsubsidized public works such as local revitalization projects. Local public bodies with a ratio of 35% or more are subject to severer restrictions and the loan flotation for some types of subsidized general public works is also restricted.

$$\text{実質公債費比率} = \frac{(A + B) - (C + D)}{E + F - D}$$

$$\textbf{Real debt service ratio used as a criterion for permission to raise local loans} = \frac{(A+B) - (C+D)}{E+F-D}$$

Debt service ratio is calculated as the past three-year average of the percentage of the sum total of revenue sources which are not earmarked and can be ordinarily raised or received every fiscal year, as represented by local taxes and ordinary local allocation tax, allocated to debt service (excluding the amount of debt service that is covered by ordinary local allocation tax).

$$\text{起債制限比率} = \frac{A-(B+C+E+G)}{(D+F)-(C+E+G)}$$

○ 財政力指数
Financial capability indicator

地方公共団体の財政力を示す指数で、基準財政収入額を基準財政需要額で除して得た数値の過去 3 年間の平均値。財政力指数が高いほど、普通交付税算定上の留保財源が大きいことになり、財源に余裕があると言える。

The term “financial capability indicator” is used to indicate the financial strength of local public bodies, and is calculated as the past three year average of the figures derived from dividing basic financial revenues by basic financial needs. A higher figure for the financial capability indicator means that the local public body can be said to have a greater margin for revenue sources.

○ ラスパイレス指数
Laspeyres index

国家公務員行政職俸給表（一）の適用者の俸給月額を 100 とした場合の地方公務員一般行政職の給与水準。

職員構成を学歴別、経験年数別に区分し、地方公共団体の職員構成が国の職員構成と同一と仮定して算出するものであり、地方公共団体の仮定給料総額（地方公共団体の学歴別、経験年数別の平均給料月額に国の職員数を乗じて得た総和）を国の実俸給総額で除して得る加重平均。

Laspeyres index is an index indicating the comparative salary level of general administration personnel in local public bodies, calculated by taking the monthly salary of national public personnel to whom the Salary Schedule of Administrative Services (Ⅰ) is applied as 100. As the method of calculation, local public personnel are classified by their academic careers and years of experience in service, and the composition of local public personnel defined in this way is then assumed to be the same as that of national public personnel. So this index is a weighed average calculated by dividing the hypothetical total amount of the monthly salary of local public personnel (sum total of the average monthly salary for each classification defined by academic careers and years of experience in service, multiplied respectively by the number of national public personnel in each classification) by the actual total amount of the monthly salary of national public personnel.

2 第三セクター等の年次別設立数（暦年）
The number of joint third sector bodies established by year (calendar year)

第三セクター等の設立数の推移をみると、昭和60年代から株式会社及び財団法人が多く設立されたこと等から平成４年にピークを迎え、平成５年以降、財団法人の設立数が減少したこと等から、設立数は減少傾向に転じ、特に平成９年以降は大幅に減少しています。

If we look at the trend in the establishment of joint third sector bodies, we can see that the number increased from the late 1980s due to the establishment of many business corporations and incorporated foundations, reaching a peak in 1992. After 1993, there was a decrease in the number of incorporated foundations established, so the number of joint third sector bodies also began to decline, and decreased dramatically especially after 1997.

Ⅳ 第三セクター等の統廃合などの状況 (平成18年度中)

Abolition and consolidation of joint third sector bodies (during FY 2006)

第三セクター等の統廃合などの状況をみると、平成18年度に廃止が203件、統合が39件（統合前85法人、統合後39法人）、出資引き揚げが40件となっています。

その理由をみると、廃止の場合は「既に事業の目的を達成しているため」、統合の場合は「組織の効率化、経営の合理化等のため」、出資引き揚げの場合は「公的関与の必要性がなくなったため」が最も多くなっています。また、特に市町村合併に伴う廃止又は統合が前年度に比べ少なくなっています。（廃止：前年度比△80件、統合：前年度比△36件）

Looking at the abolition and consolidation of joint third sector bodies, we can find 203 cases of abolitions, 39 cases of consolidations (85 corporations before consolidation, and 39 corporations after consolidation), and 40 cases of withdrawal of investment, etc.

The major reasons for these various cases are “the purpose of the enterprise has been achieved” in the case of abolitions, “structural efficiency and administrative rationalization” in the case of consolidations, and “no longer a need for strong public involvement” in the case of withdrawal of investment.

We can find less cases of abolition and consolidation which were accompanied by the merger of municipalities. (abolitions :△ 80 cases, consolidations : △ 36 cases)
